TITLE OF INVENTION: METHOD AND APPARATUS FOR TRANSFERRING DATA FROM A MEMORY SUBSYSTEM TO A NETWORK ADAPTER FOR IMPROVING THE MEMORY SUBSYSTEM AND PCI BUS EFFICIENCY

APPLN. TYPE	SMALL ENTITY	ISSUE FEE	ISSUE FEE PUBLICATION FEE		DATE DUE
nonprovisional	NO	\$1400	\$300	\$1700	03/15/2006

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B - Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail

Mail Stop ISSUE FEE Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 454 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 454 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571) 272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Application/Control Number: 10/621,931

Art Unit: 2186

Attorney's Docket No.: AUS920030471US1

IN THE UNITED STATES PATENT AND

TRADEMARK OFFICE

In re application of: Dierks et al. Group: 2186

Serial No.: 10/621,931 Examiner: Tuan Thai

For: METHOD AND APPARATUS FOR TRANSFERRING DATA FROM A

MEMORY SUBSYSTEM TO A NETWORK ADAPTER FOR IMPROVING THE

MEMORY SUBSYSTEM AND PCI BUS EFFICIENCY.

1. This action is responsive to Examiner interview conducted on November 30, 2005. Claims 1, 6, 9-10, 15 and 18-22 are amended. Claims 5, 7, 14 and 16 are now canceled. Claims 1-4, 6, 8-13, 15 and 17-22 are now allowed.

EXAMINER'S AMENDMENT

- 2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 3 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.
- 3. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Mark E. McBurney; Reg. No. 33,114 on

Art Unit: 2186

November 30, 2005.

4. The application has been amended as follows:

a. <u>In the claims</u>:

al. Amending claims 1, 6, 9-10, 15 and 18-22 as following:

Claim 1 (amended) A method in a data processing system for
transferring data from a memory to a network adapter, the method
comprising:

receiving a request to transfer data to a network adapter; and

setting an offset for a starting address of the data to align the data with an end of a frame in the memory, wherein the frame is transferred from the memory to the network adapter[.];

wherein the offset is zero if a frame size of the frame divided by a cache line size is zero.

Claim 6 (amended) A method in a data processing system for
transferring data from a memory to a network adapter, the method
comprising:

identifying an amount of the data;

if the frame size for a frame is divisible by a cache line size with a remainder, setting an offset for the data to align

Art Unit: 2186

the data to an end of the frame;

and if the frame size for [if] the frame size divided by the cache line size without a remainder, setting the offset to zero[.];

wherein the offset is determined using the following:

offset=CLS-(frame size-ABS(frame size/CLS)*CLS wherein CLS is the

cache line size.

<u>Claim 9</u> (amended) The method of claim [7] <u>6</u> further comprising: transferring the frame to the network adapter after offsetting the data using the offset.

<u>Claim 10</u> (amended) A means in a data processing system for transferring data from a memory to a network adapter, the data processing system comprising:

receiving means for receiving a request to transfer data to a network adapter; and

setting means for setting an offset for a starting address of the data to align the data with an end of a frame in the memory, wherein the frame is transferred from the memory to the network adapter[.];

wherein the offset is zero if a frame size of the frame divided by a cache line size is zero.

Art Unit: 2186

<u>Claim 15</u> (amended) A means in a data processing system for transferring data from a memory to a network adapter, the data processing system comprising:

identifying means for identifying an amount of the data; first setting means for setting an offset for the data to align the data to an end of the frame if the frame size for a frame is divisible by a cache line size with a remainder; and

second setting means for setting the offset to zero if the frame size for if the frame size divided by the cache line size without a remainder[.];

wherein the offset is determined using the following:

offset=CLS-(frame size-ABS(frame size/CLS)*CLS wherein CLS is the

cache line size.

<u>Claim 18</u> (amended) The data processing system of claim [16] <u>15</u> further comprising: transferring means for transferring the frame to the network adapter after offsetting the data using the offset.

<u>Claim 19</u> (amended) A computer program product in a computer readable medium for transferring data from a memory to a network adapter, the computer program product comprising:

first instructions for receiving a request to transfer data to a network adapter; and

Art Unit: 2186

second instructions for setting an offset for a starting address of the data to align the data with an end of a frame in the memory, wherein the frame is transferred from the memory to the network adapter[.];

wherein the offset is zero if a frame size of the frame divided by a cache line size is zero.

<u>Claim 20</u> (amended) A computer program product in a computer readable medium for transferring data from a memory to a network adapter, the computer program product comprising:

first instructions for identifying an amount of the data; second instructions for setting an offset for the data to align the data to an end of the frame if the frame size for a frame is divisible by a cache line size with a remainder; and

third instructions for setting the offset to zero if the frame size for if the frame size divided by the cache line size without a remainder[.];

wherein the offset is determined using the following:

offset=CLS-(frame size-ABS(frame size/CLS)*CLS wherein CLS is the

cache line size.

<u>Claim 21</u> (amended) A server data processing system for obtaining cultural context information from a client, the server data

Art Unit: 2186

processing system comprising:

- a bus system;
- a network adapter connected to the bus system;
- a memory connected to the bus system, wherein the memory includes a set of instructions; and
- a processing unit connected to the bus system, wherein the processing unit executes a set of instructions to receive a request to transfer data to a network adapter; and set an offset for a starting address of the data to align the data with an end of a frame in the memory, wherein the frame is transferred from the memory to the network adapter[.];

wherein the offset is zero if a frame size of the frame divided by a cache line size is zero.

- <u>Claim 22</u> (amended) A server data processing system for obtaining cultural context information from a client, the server data processing system comprising:
 - a bus system;
 - a network adapter connected to the bus system;
- a memory connected to the bus system, wherein the memory includes a set of instructions; and
- a processing unit connected to the bus system, wherein the processing unit executes a set of instructions to identify an amount of the data; set an offset for the data to align the data

Art Unit: 2186

to the end of the frame if the frame size for a frame is divisible by a cache line size with a remainder; and to set the offset to zero if the frame size is divided by the cache line size without a remainder[.];

wherein the offset is determined using the following:

offset=CLS-(frame size-ABS(frame size/CLS)*CLS wherein CLS is the

cache line size.

REASONS FOR ALLOWANCE

5. The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record does not teach or suggest, alone or in combination, all the limitations of the amended claim of the current invention (claim 1). The closest prior art of record, Wooten reference 5,911,152 discloses the system and method for storing data in a buffer which crosses page boundaries utilizing beginning and ending buffer pointers. Wooten however does all the combined limitations of the claims invention; particularly the concept of transferring data from a memory subsystem to a network adapter wherein setting an offset for a starting address of the data to align the data with an end of a frame in the memory, the frame is transferred from the memory to the network adapter and the offset is zero if a frame size of the frame divided by a cache line size is zero (claims 1, 10, 19 and 21)

Art Unit: 2186

nor does the prior art references discloses identifying an amount of the data; if the frame size for a frame is divisible by a cache line size with a remainder, setting an offset for the data to align the data to an end of the frame; and if the frame size for [if] the frame size divided by the cache line size without a remainder, setting the offset to zero, the offset is determined using the following: offset=CLS-(frame size-ABS(frame size/CLS)*CLS wherein CLS is the cache line size (claims 6, 15, 20 and 22). In light of the foregoing, claims 1, 6, 10, 15 and 19-22 of the present application is found to be patentable over the prior arts. Claims 2-4, 8-9, 11-13 and 17-18 further limit the allowable independent claims. These claims are therefore allowable for the same reason as set forth above.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan V. Thai whose telephone number is (571)-272-4187. The examiner can normally be reached on from 6:30 A.M. to 4:00 P.M..

If attempts to reach the examiner by telephone are

Art Unit: 2186

TVT/December 02, 2005

unsuccessful, the examiner's supervisor, Mathew M. Kim can be reached on (571)-272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

See Summary of Record of Interview requirements on reverse side or on attached sheet.					
Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.	Examiner's sign	ature, if required			

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by
 attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does
 not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
 - (The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.
